

1. Open in GitHub Codespaces

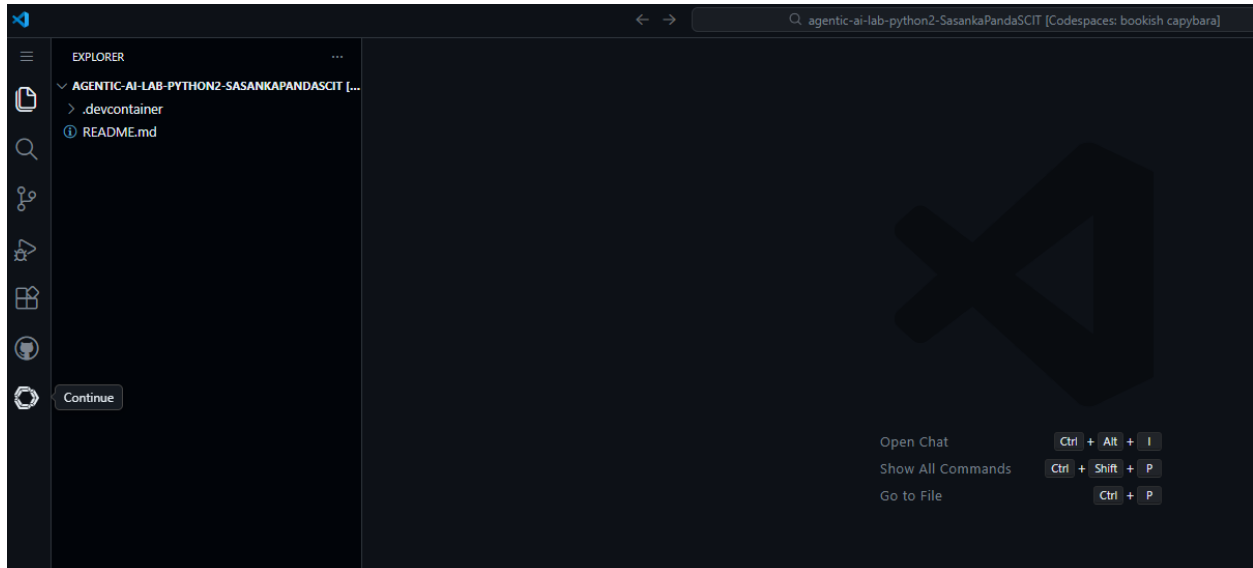

Browser version of codespace is opened(Takes a few minutes)

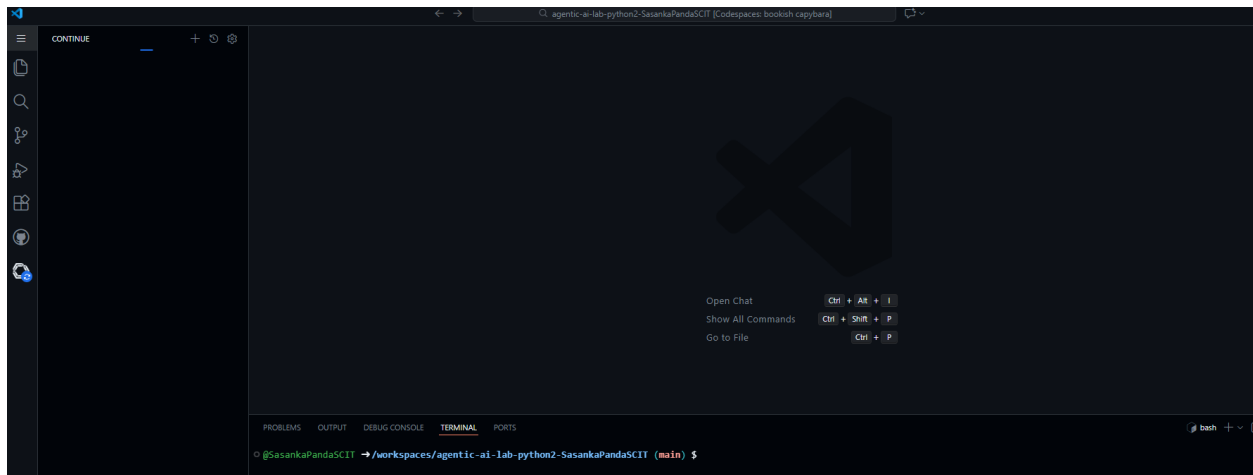

Starter code is loaded as shown above

2. Extension “Continue” is already loaded

It take a few minutes to initialize “Continue” when you access for the 1st time

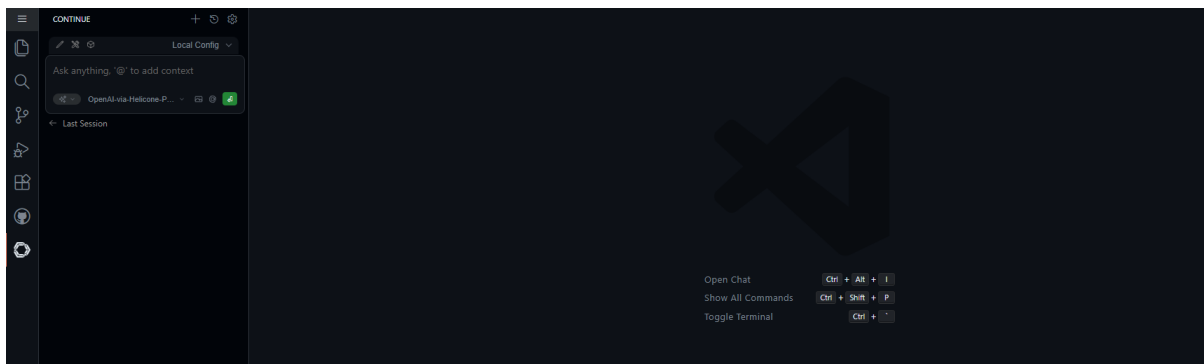

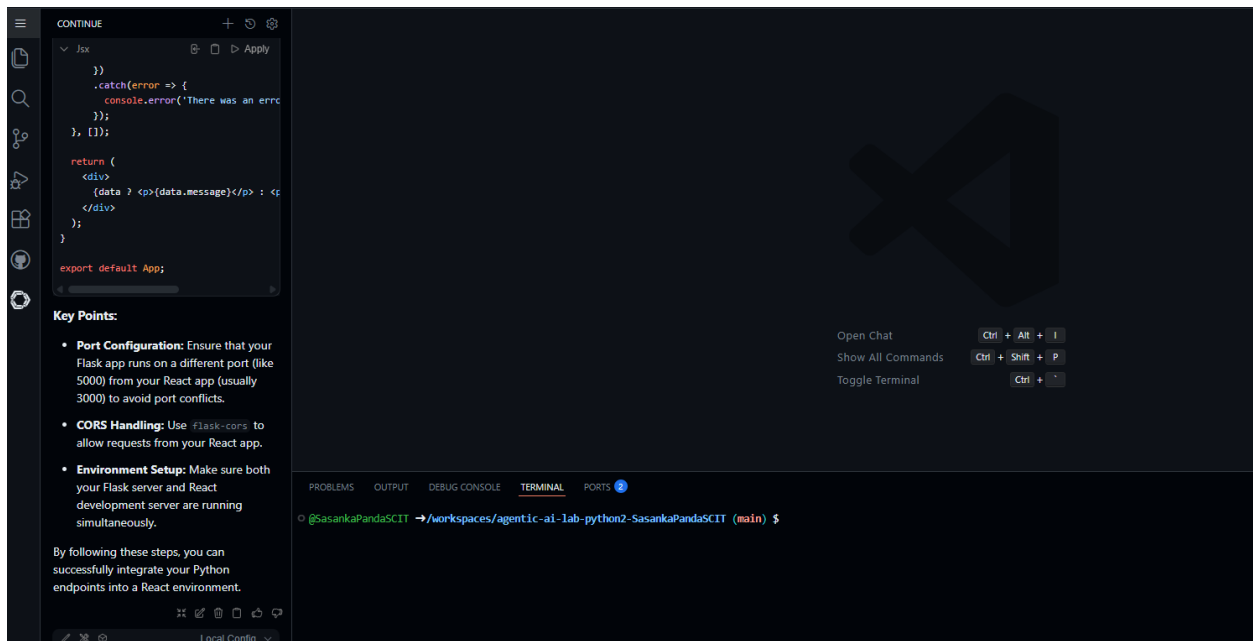

3. Use Continue

“X” out if you see pop-up as show below”

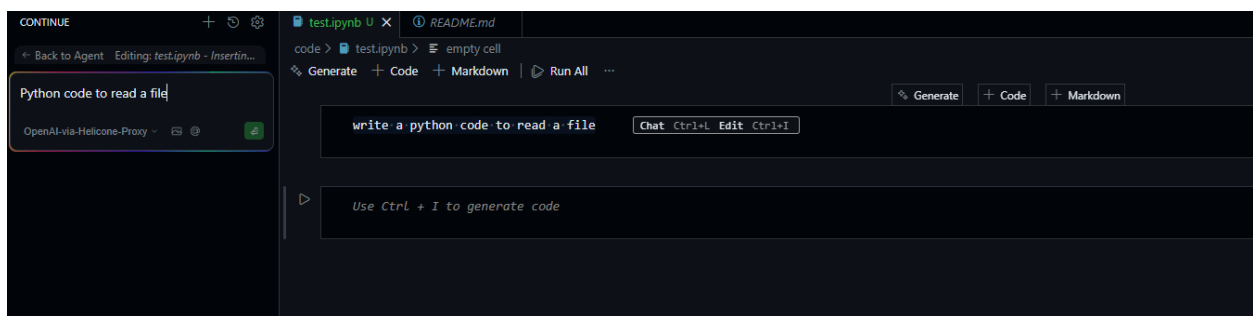

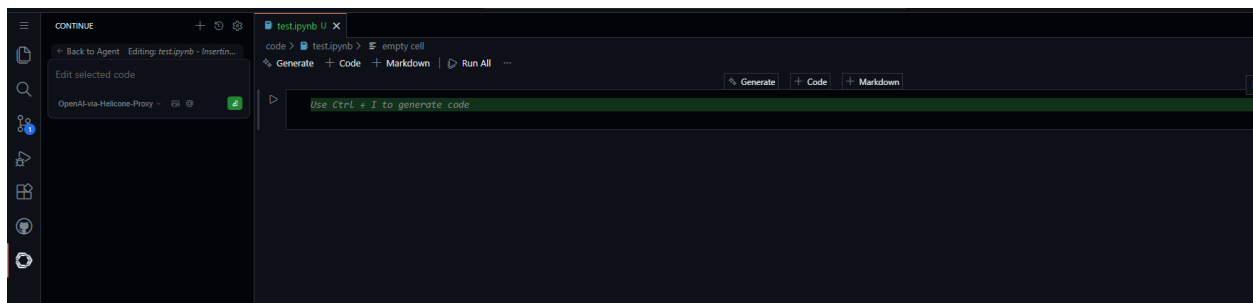

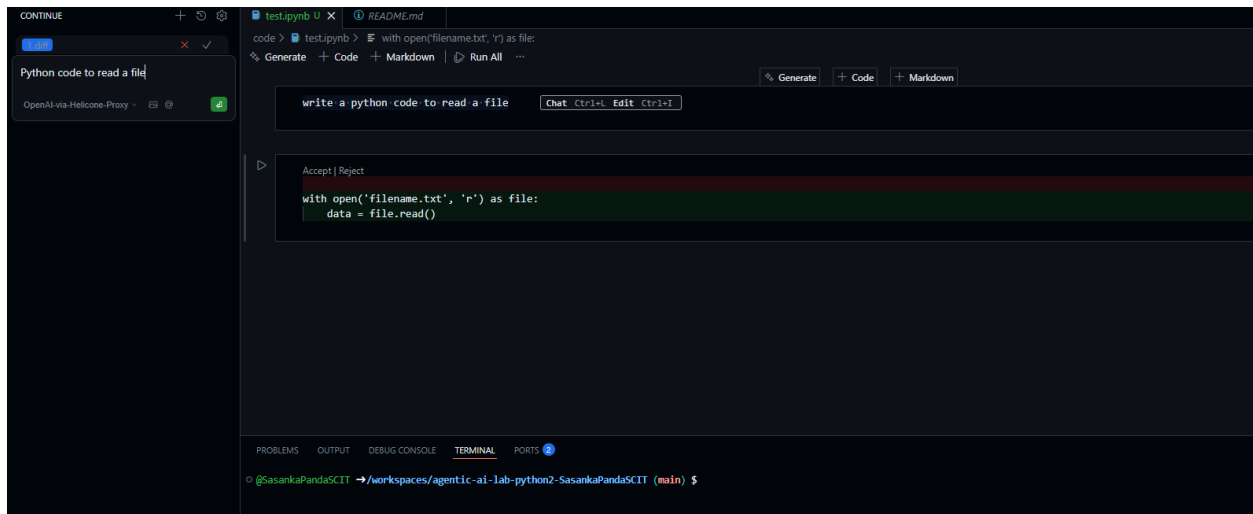

Use Continue as chat mode

Use Continue as Edit & Assist Modes

4. Optionally, we can install desktop version of Codespace as shown below
